Released March 2016

SY Wolf Emerges as 2016's Top Winter Wheat Variety

SY Wolf was the most popular winter wheat variety planted for the 2016 Nebraska winter wheat crop, according to USDA's National Agricultural Statistics Service. Released in 2012, SY Wolf has since grown from a negligible share to the largest variety by planted acreage. Winter Hawk jumped from eighth in 2015 to take second place, while 2015's most popular variety, Settler CL, fell to third.

SY Wolf accounted for 7.4 percent of the acreage, while Winter Hawk nearly doubled its 2015 share to 7.0 percent. Settler CL fell 2.6 percentage points to 6.9 percent. Brawl CL Plus and Overland retained their positions in fourth and fifth place, respectively.

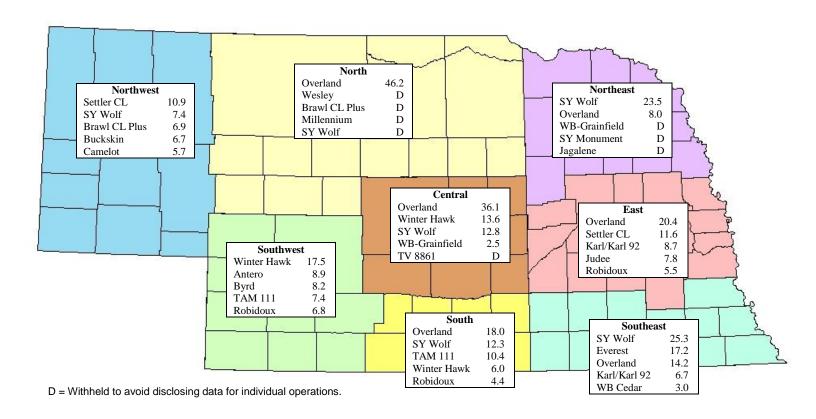

Winter Hawk was most popular in Southwestern Nebraska, while Settler CL was the top variety in the Northeast district. Overland, the most popular variety statewide in 2012, took the largest share in the North, Central, South, and East districts. SY Wolf overtook Everest as the top variety in the Southeast district. Of the

total hard white winter wheat acreage for 2016, the most common variety planted was Antero, which more than tripled its 2015 share.

Supporting funds for this report, "Nebraska Wheat Varieties", were provided by the Nebraska Wheat Board from wheat producer check off funds.

This report was derived from 1,058 voluntary reports provided by Nebraska wheat producers who responded to the 2016 Nebraska Wheat Varieties Survey. This summary includes reports representing nearly twenty five (25) percent of the state's total planted acreage estimate.
